Bank  Count Corp.

The Organization

Bank-A-Count, a privately owned corporation, was founded in 1955 as a provider of bookkeeping information offered through an automated check recording system. In the 1960's Bank-A-Count used its state-of-the-art computer technology to become a national leader in the supply of loan amortization schedules and related financial computations. As computer use expanded nationally, payment coupons were developed as a product line in the 1970's, and check printing product lines were developed in the 1980's.

Today, Bank-A-Count provides processing services for a variety of industries and companies across the United States. Clients include property management companies, financial & non-financial institutions, and other businesses.

Processing System

A time tested, integrated production processing system ensures the accuracy and on-time delivery of your documents. Proofs generally become available to you within an hour during normal business hours. Turnaround time for standard orders is normally 1 business day, with many shipments made within 24 hours! During the peak season in mid-late December, please allow a couple of additional days for your order to ship.

The system has a single interface for the order processors to:

- Review customer comments and make necessary changes
- Troubleshoot orders with order input errors
- Track orders that are in proof status
- Track how long orders are in production, ensuring that orders do not get hung up within the printing, bindery, or shipping areas

This system auto runs the orders allowing your orders to flow through the production systems as quickly as the processing systems can handle them. Resulting in incredibly fast turnaround times.
